Kratek opis

Pre-assembly supports for stainless steel cutting ring fitting, M16x1.5, Pipe exterior Ø 10 mm, AF 17, PN max. 315 bar
When stainless steel pipes are assembled, they must always be pre-assembled in a hardened pre-assembly adapter.
They must never be assembled directly in the stainless steel adapter. The cones of the pre-assembly adapters are susceptible to wear and must therefore be inspected at regular intervals to check that they are still true to gauge.
We recommend using only seamless, soft-annealed, stainless steel pipes made of 1.4571 according to DIN 2391 Part 1 or DIN 2462, tolerance class D4/T3.
