## Ploščati ventil HDM priključek 6 mm 3/2 monost. NC ali NO

Kategorija: [Valve disc for HDM valve terminal with 6 mm port](#)

Šifra: **106683RIE**

### Kratek opis

Valve disc for valve terminal HDM, Connection 6 mm, 3/2-way, NC, Monostable and 3/2-way, NO, monostable

These compact valve terminals, with a maximum flow rate of 800 NI/min, can be individually adapted to the specific conditions of each application thanks to the wide range of functions and various input and intermediate plates.

Since each valve terminal is a customer-specific combination of a series of individual elements, the catalogue only lists the available input, intermediate and end plates as well as the different valve discs and the 25-pin multi-pole connectors.

Suitable for filtered, unlubricated or lubricated compressed air. If lubrication is used, it must be continuous.

Monostable (non-latching) version of manual control also available on request.

The operating pressure is based on the installed input plates.

### Tehnične Specifikacije

|                                |                                                     |
|--------------------------------|-----------------------------------------------------|
| Min. temperaturno območje [°C] | -10                                                 |
| IP zaščita                     | IP 65                                               |
| Material                       | aluminium                                           |
| Poskusno                       | Max. 16 (e.g. 16 spring return valves)              |
| Ročno upravljanje              | latching                                            |
| Vhodna moč                     | 0.6 W per pilot                                     |
| Funkcija                       | 3/2-way, NC, monostable and 3/2-way, NO, monostable |
| Max. temperaturno območje [°C] | 60                                                  |
| Pretok [NI/min]                | 500                                                 |
