## Stainless steel ball valve, weld-on studs, for tube O.D. 42.4 mm

Kategorija: [Ball valves with weld-on ends](#)

Šifra: **103460RIE**

### Kratek opis

Stainless steel ball valve, 3-pcs., weld-on studs, Full passage, Operat. temp. -20°C to 150°C, PN max. 63 bar, f. tube O.D. 42.4mm

### Tehnične Specifikacije

|                               |                                              |
|-------------------------------|----------------------------------------------|
| Min. delovna temperatura [°C] | -20                                          |
| Bore diameter padlock         | ca. 7.5 mm                                   |
| Delovni tlak                  | max. 63 bar (dependent on temperature)       |
| ISO 5211                      | F 04 / F 05                                  |
| Krogelno tesnilo              | RPTFE (15 % glass fibre reinforced)          |
| Krogla                        | Stainless steel 1.4408                       |
| Ohišje                        | Stainless steel 1.4408                       |
| Ročica                        | Stainless steel 1.4301, with plastic coating |
| Stebelno tesnilo              | RPTFE (15 % glass fibre reinforced)          |
| B [mm]                        | 94.0                                         |
| L [mm]                        | 110.0                                        |
| Max. delovna temperatura [°C] | 150                                          |
| A [mm]                        | 152.0                                        |
